

Winch Drive (WT4100 Series)

The WT4100 Worm Gear Winch is a hydraulically driven Winch drive. This unit is used on small booms, but could be used in any application where a winch or speed reduction is needed. Due to the rugged construction of this winch it is able to withstand the high loads that are common to crane usage.

Winch Reducer:

4.140" Center Distance Worm Gear Reducer

Ratio:

38:1, Or to Customer Specification

Rating:

Output Capacity 19,800 in-lbs.
Efficiency Static 34%
Dynamic 56%

Weight:

33 Lbs.

Output Shaft:

To Customer Specification

Drag Brake:

Adjustable

Hydraulic Motor Mount:

SAE "A" Mount, 2 Bolt, Keyed or Splined Shaft
